

Storchenwiege® BabyCarrier

Version with tie-together belt

Dear Customer,

Thank you for choosing a Storchenwiege® BabyCarrier with a tie-together belt. In this version, the belt does not clip together, but instead ties up in a double knot. That is the only difference to the version shown in the photographs for these instructions.

Once you have adjusted the width of the crotch support to fit the size of your child (see Page 3 of the enclosed instructions), please take note of the following information on the different carrying positions:

1. Tummy to tummy

To fasten the belt with a **tight**, well-placed **double knot**, first position the BabyCarrier so that both ends of the belt are at the front. Tie the ends together with a tight double knot so that the BabyCarrier is firmly in place at your waist (or slightly higher, depending on how big your child is). Then push the knot round to the back so that the back panel is hanging down at the front. Now continue as described from Step 2 (Page 4, Image 2 in the enclosed instructions).

2. Back carry

Put on the belt as described for the tummy-to-tummy position. Then push the knot round to the side until the back panel is hanging down at the side (see Page 8, Image 1 in the enclosed instructions). Now continue as described from Step 2 (Page 8, Image 2 in the enclosed instructions).

Have a great time using the carrier!
